Rear pushrod			

Clarification of using of rear pushrod AV4015 and AV4145.
Its legal to use progressive pushrod for this recommended setup.

This rear setups can be tested ,works good in bumpy condition

Rear 1	Chassi Height		Chassi Height	
	front	180 mm	rear	175 mm
	Plattform front	60 mm	Plattform rear	59 mm

Position for pushrod on this are non progressive 240 mm travel.

Plattfrom height measured between top of nut and edge on damper body, **this measure should never be more then 72 mm** for best performance on damper.
