

SUPERCAR LITES

Technical Bulletin

Number	SCL_TB_002	Date	04.01.2018
Revision	000	Issuer	SuperCar Lites
Window Opening For Fuel Tank Certification on AV4341 Inner Shell			

To be able to identify the validity of the AV3282 Fuel Tanks of the SuperCar Lites, a cut-out of the size 50x105mm has to be opened on the AV4341 Inner Shell.

Below are the locational dimensions of the cutout. The cutout will then be covered by a 5mm Polycarbonate - AV5137 Inner Shell Fuel Tank Window - to seal the cutout and maintain visibility.
